PROFESSIONAL PROFILE

Recent IT graduate awarded D*D*D* in the BTEC Level 3 National Extended Diploma in Information Technology, with hands-on experience across cloud infrastructure, full-stack development and cybersecurity. Completed a six-week IT internship at Encon Pharma, building and deploying a serverless cold-chain application using AWS, Terraform, Next.js and TypeScript, supported by automated testing and Agile delivery. Award-winning hackathon experience developing an AI mock-interview platform using ElevenLabs. Disciplined, analytical and organised, with strong communication skills and a focus on continuous improvement. Seeking an entry-level IT role or cybersecurity degree apprenticeship.

TECHNICAL SKILLS

Cybersecurity: Security fundamentals, SIEM concepts, network security, Wireshark, PCAP analysis, network forensics fundamentals, IAM awareness

Cloud & Infrastructure: AWS Lambda, API Gateway, DynamoDB, SNS, SQS, CloudWatch, Amplify, S3, Terraform, Infrastructure as Code, remote state

Development: JavaScript, TypeScript, Node.js, Next.js, React, Python, HTML5, CSS3, PHP, SQL fundamentals, REST APIs

Testing & Delivery: Jest, Postman, automated testing, Git/GitHub, pull requests, code review, Agile/Scrum, CI/CD concepts

PROFESSIONAL EXPERIENCE

IT Intern | Encon Pharma | Aug 2026 - Sep 2026

Six-week software engineering / cloud internship

- Built a full-stack cold-chain temperature monitoring application using AWS, Terraform, Next.js and TypeScript, allowing users to create, view, edit and delete temperature readings
- Developed a REST API using API Gateway, Lambda and DynamoDB, with validation, UUIDv4 IDs and automatic classification of readings as OK or excursion
- Implemented an event-driven alert pipeline using SNS, SQS and Lambda, with retry handling, idempotency protection and a Dead-Letter Queue for failed messages
- Rebuilt and managed the backend using Terraform Infrastructure as Code, including S3 remote state and DynamoDB state locking, and verified the environment through full destroy-and-rebuild and Postman testing
- Created Jest/Node.js automated tests and a deployment test gate, and developed the frontend using Next.js, TypeScript, Tailwind CSS and TanStack Query before deployment through AWS Amplify
- Worked within a development team using Agile and Git methodologies, facilitated a team retrospective, collaborated with regional and offshore developers, and presented my completed application to the wider development team

IT Management & E-commerce Assistant | Mirfield Automotive Spares Ltd | Jun 2023 - Present

Part-time | Local automotive company

- Manage the company eBay store, including product listings, order processing, sales monitoring and customer service.
- Monitor stock levels and coordinate with colleagues to maintain order accuracy, availability and customer satisfaction.
- Balance part-time employment alongside education and technical development, strengthening organisation, reliability and time management.

Technology Work Experience / Shadowing | Barclays Technology Centre, Radbroke | Aug 2025

- Shadowed technology professionals in a large corporate environment, gaining insight into enterprise IT, platform delivery, architecture and project collaboration.

- Received guidance from senior staff including a Digital Platform Director and Solutions Architect, developing professional communication and awareness of technology careers.

SELECTED PROJECTS & ACHIEVEMENTS

Groot - AI Mock Interview Platform | Bradford Agentic AI Hackathon | Oct 2026

- Co-developed an AI-powered mock interview platform that uses a candidate's CV, experience and job requirements to create tailored interview questions and real-time voice interactions.
- Integrated ElevenLabs AI agents for conversational interviewing, with feedback, scoring and progress tracking; worked collaboratively using Lovable AI and GitHub.
- Pitched the working product to an audience and panel of judges and won the Best Use of ElevenLabs award.

Malware Traffic Analysis Lab | Personal Cybersecurity Project | In progress

- Developing practical network-analysis skills using Wireshark and PCAP captures, with a focus on recognising suspicious traffic patterns and building evidence-led network-forensics habits.

WebHub - First Website | College Project | Completed

- Built a hand-coded website using HTML, CSS, JavaScript and PHP, establishing the foundation for later full-stack and cloud projects.

EDUCATION

BTEC Level 3 National Extended Diploma in Information Technology | Huddersfield New College | 2024 - 2026
Achieved: D*D*D*

GCSEs | Huddersfield Grammar School | 2019 - 2024
Combined Science 8-8 | History 6 | Business 6 | Fine Art 6 | Mathematics 5 | Computer Science 5 | English Language & Literature 4

CERTIFICATIONS

AWS Cloud Technical Essentials - Amazon Web Services / Coursera | **Jul 2026**
Foundations of Cybersecurity - Google / Coursera | **Aug 2025**
Programming for Everybody (Getting Started with Python) - University of Michigan / Coursera | **Aug 2025**
Crash Course on Python - Google / Coursera | **Jul 2025**

ADDITIONAL ACHIEVEMENTS & INTERESTS

- Martial arts: 1st Dan black belt; trained since childhood and competed in Muay Thai, developing discipline, resilience and composure under pressure.
- Charity: climbed Scafell Pike and Ben Nevis with my twin brother, raising more than £1,600 through One Nation UK to support two poultry farms in Ghana.
- Full UK Driving Licence, issued June 2026.
